Impact of Quantum Computing, Tokenization and Next-Gen Data Centres on the **Future of Capital** and **Digital Infrastructure**

The Big Questions

- If quantum breaks today's encryption, what happens to banking and digital identity?
- How do we secure public digital infrastructure before disruption?
- Can next-gen data centres power AI and quantum - securely and sustainably?
- Will tokenisation reshape global capital markets?

What You Will Walk Away With

- Live quantum computer in action, beyond theory
- Clear post-quantum risk assessment for finance and digital infrastructure
- Strategic clarity on tokenised markets
- A framework for next-gen compute and sovereign resilience
- Access to the leaders shaping the shift

[Get Your Pass](#)

Distinguished Speakers

Hon. Stephen Dawson MLC
Minister for Regional Development; Ports; Science and Innovation; Medical Research; Kimberley Government of Western Australia

Driving economic diversification and advocating for regional communities across Western Australia

Ravi Menon
Ambassador (Climate Action), Singapore, Former Managing Director, Monetary Authority of Singapore, Chairman of the Board of Directors, Global Finance & Technology Network

Harnessing technology and innovation for resilient and inclusive financial ecosystems globally

Venerable Ajahn Brahm
Abbot
Bodhinyana Monastery

Abbot of the largest Buddhist monastery in the Southern Hemisphere

Prof. Bernard Carr
Emeritus Professor of Mathematics and Astronomy
Queen Mary University of London

Studied the first second of the universe with Stephen Hawking at Cambridge University and Caltech

Kate Cooper
Chief Executive Officer and Board Director
OKX

Author of EDGE - guiding leaders to retain judgment as systems move faster and stakes rise

Dr. Michelle Simmons
Founder & Chief Executive Officer
Silicon Quantum Computing

Multi-award winner leading the global race to build a quantum computer in silicon

Dr. W. Scott Stornette
Chief Executive Officer
SureMark Digital Identity Services

Co-inventor of blockchain

Sopnendu Mohanty
Group Chief Executive Officer
Global Finance & Technology Network (GFTN)

Established Singapore as a global fintech hub and credited with developing PayNow, Singapore's digital public infrastructure for payments

Tan Bin Ru
President
Enterprise Digital ST Engineering

Leading Enterprise Technologies in Quantum, Blockchain and AI

Innovation Tours

DUG Technology

An inside look at green, mobile high-performance computing and how it enables scalable AI, decentralised infrastructure (DePIN), and resilient digital systems

Monday 23 March | 10:00 – 11:00
DUG Technology

This Innovation Tour showcases one of Western Australia's most advanced digital infrastructure developments: high-density, energy-efficient high-performance computing (HPC) designed for an AI-first era, with green compute, resilience, and rapid deployment at its core.

Through direct engagement with DUG's facilities and experts, Black Swan Summit delegates can gain practical insight into how mobile and modular HPC can support next-generation AI workloads, edge analytics, and emerging decentralised infrastructure models, while strengthening regional capability and sovereign-grade digital capacity.

Located in Western Australia, a politically and economically stable jurisdiction powered by expanding renewable energy and strategically positioned in the Indo-Pacific, the tour highlights a scalable model for how Australia can deliver trusted, greener compute capacity to partners across Southeast Asia.

Pawsey Supercomputing Research Centre

Meet Setonix: The Southern Hemisphere's computational powerhouse driving breakthroughs in climate, health, and discovery

Monday 23 March | 11:45 – 13:30
Pawsey Supercomputing Research Centre

This session takes participants inside Pawsey's world-class supercomputing centre to explore how classical High-Performance Computing (HPC) and emerging quantum technologies will coexist in practice.

Through an innovation tour and interactive presentation, attendees will see how Setonix, a supercomputer located at the Pawsey Supercomputing Research Centre, and Pawsey's on-site quantum capabilities can be orchestrated together as hybrid workflows, where quantum acts as a specialised accelerator within familiar supercomputing environments.

The session will highlight real-world use cases, integration challenges, and the talent and infrastructure Western Australia is building to lead in quantum enhanced digital innovation.

UWA Innovation Tour

Step Inside the Quantum Revolution

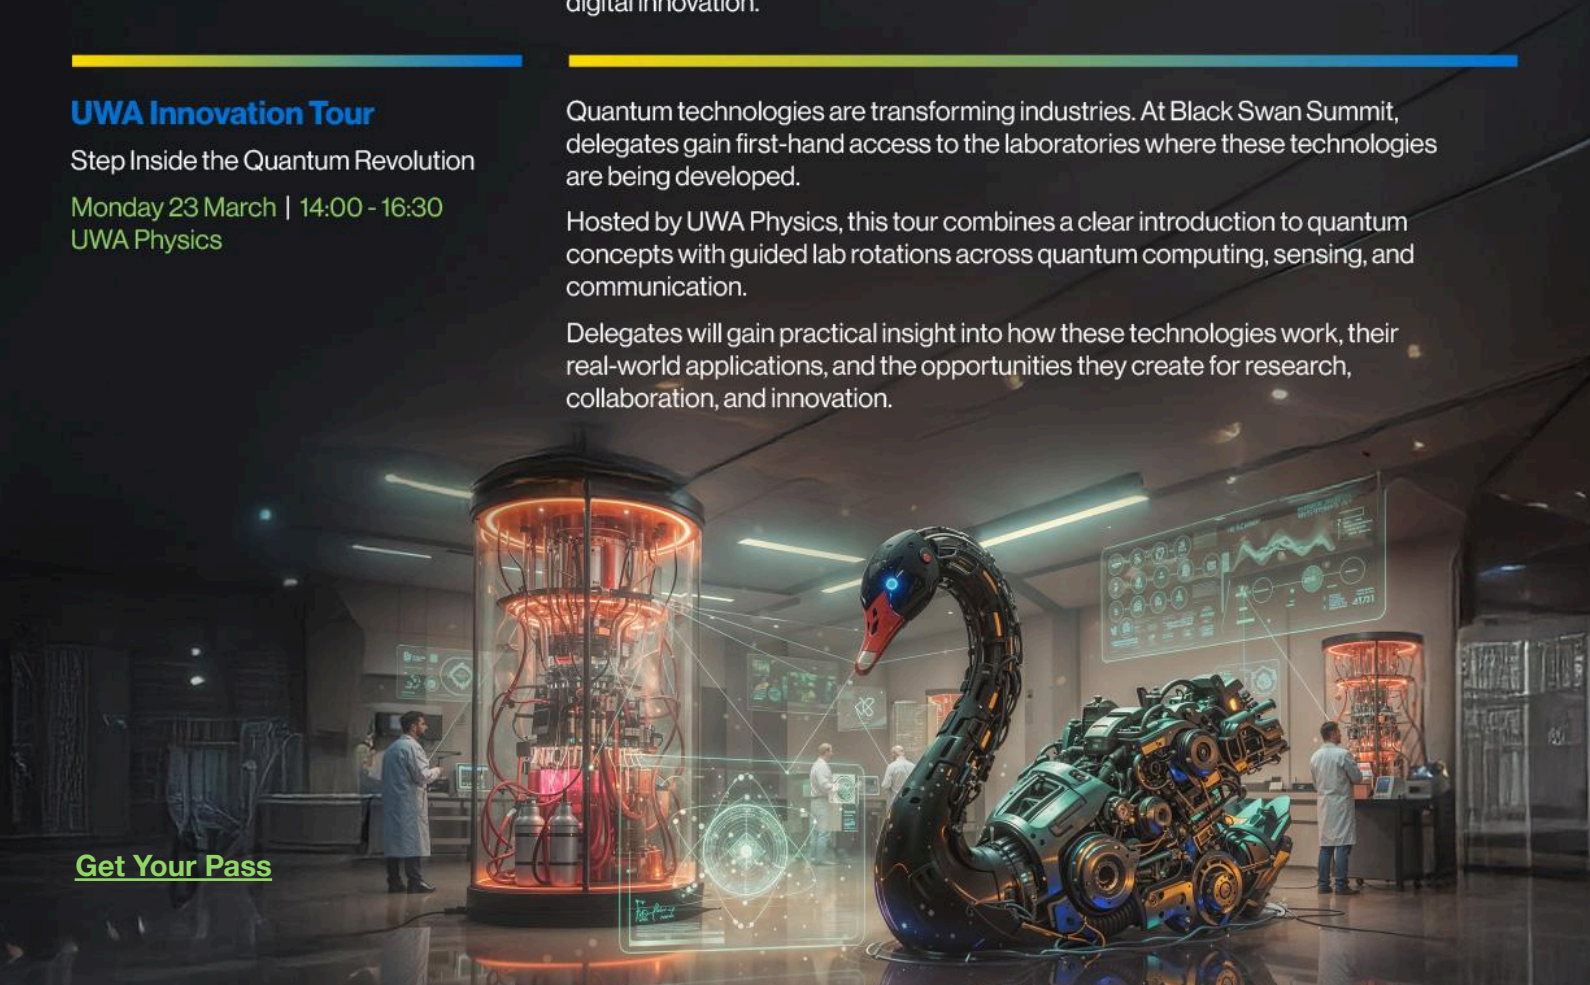

Monday 23 March | 14:00 - 16:30
UWA Physics

Quantum technologies are transforming industries. At Black Swan Summit, delegates gain first-hand access to the laboratories where these technologies are being developed.

Hosted by UWA Physics, this tour combines a clear introduction to quantum concepts with guided lab rotations across quantum computing, sensing, and communication.

Delegates will gain practical insight into how these technologies work, their real-world applications, and the opportunities they create for research, collaboration, and innovation.

[Get Your Pass](#)

The Quantum Experience.

Quantum is Reshaping Our Industries - Are You Ready?

Quantum computing, tokenisation, and next-generation data infrastructure are no longer emerging concepts. They are active priorities for governments, financial institutions, and technology leaders worldwide.

Australia is making significant investments in quantum technology. The nation is home to world-leading silicon quantum research. And Perth sits at the intersection of energy, compute, and capital, making it a uniquely important location for this conversation.

Black Swan Summit Australia bring together the researchers, policymakers, and senior industry leaders who are defining what comes next across quantum, tokenized markets, and the infrastructure that will power both.

Introducing Q-FINEX

Tuesday 24 March

Q-FINEX (Quantum Finance Industry Experimentation) is a GFTN programme that lets financial institutions test quantum computing against their own real-world problems without committing to the technology prematurely. Run in partnership with UWA's quantum research group (QUISA), it pairs finance teams with researchers to evaluate whether quantum or hybrid methods could add value to challenges like portfolio optimisation, risk modelling, and cryptography transition planning.

Black Swan Summit Australia marks the official launch of Q-FINEX. Join us for a dedicated workshop where our programme leads will walk through the framework and open the floor for institutions interested in submitting a use case.

[Get Your Pass](#)

A futuristic exhibition space with a large mechanical swan sculpture, holographic displays, and people interacting with technology. The scene is illuminated with blue and white light, creating a high-tech atmosphere. The swan sculpture is the central focus, surrounded by various interactive displays and people in business attire. The background features large windows and more displays, suggesting a modern, high-tech environment.

Tuesday, 24 March 2026

Summit Stage

<p>24 Mar 9:00am - 9:15am</p> <p>Winthrop Hall</p>	<p>Building the Next Economy - Machines • Money • Humanity</p> <p>This opening sets the Summit’s narrative arc, how the next economy will be defined by resilient infrastructure, trusted financial rails & human-centred outcomes. We zoom out across history, systems & the future to frame why AI, quantum, digital assets & green infrastructure must be built as public-private impact infrastructure, not just technology. Expect a clear “why now” & shared North Star for the entire program.</p> <p>Speakers: Dr. Andrzej Gwizdalski, Co-founder & Chairman, Western Australia Web3 Association</p>
<p>24 Mar 9:15am - 9:30am</p> <p>Winthrop Hall</p>	<p>Address by Guest of Honour</p> <p>Speaker: Hon. Stephen Dawson MLC, Minister for Regional Development; Ports; Science and Innovation; Medical Research; Kimberley, Government of Western Australia</p>
<p>24 Mar 9:45am - 10:25am</p> <p>Winthrop Hall</p>	<p>Green Critical Infrastructure for the Next Economy - Building the Indo-Pacific Stack for Energy, Compute & Trust</p> <p>The Next Economy won’t be built on AI software alone — it requires clean energy, a resilient supply of chips, scalable compute and data centres, high-performance connectivity, trusted governance, and talent that investors and partners can rely on.</p> <p>This panel presents Western Australia as a live case study that is illustrative of the “Indo-Pacific Multi-Layer Next Economy Stack”, with discussions on how regional advantage translates into bankable projects, resilient digital markets and real jobs. Audiences will leave with a clearer insights into what can move in the next 12–24 months across energy, compute, connectivity, and trust rails.</p> <p>Speakers: Brad Carr, Executive, Geopolitical Risk, National Australia Bank Prof. Gordon Flake, Chief Executive Officer , Perth USAsia Centre Serena King, Assistant Director Cyber Security Engagement WA, National Office of Cyber Security, Department of Home Affairs Brett Looney, Principal Solutions Architect, AWS</p> <p>Moderator: Prof. Peta Ashworth, Director, Curtin Institute for Energy Transition</p>

24 Mar
10:25am - 11:00am

Winthrop Hall

The Race for Quantum Resilience & First-Mover Advantage - How Industry and Governments Should Act

Quantum isn't just a future promise - it is a revolutionary technology that reshapes industries & places governments in competition to adopt & control it first. This session cuts through hype to focus on where quantum delivers practical advantage, what "quantum-ready" infrastructure means & what preparations must begin immediately for long-lifecycle systems & security. Attendees will gain clarity on what's real, what's next & how quantum intersects with AI, digital assets & critical infrastructure.

Speakers:

Tan Bin Ru, President, Enterprise Digital, ST Engineering

Mark Stickells, Chief Executive Officer, Pawsey Supercomputing Research Centre

Prof. Jingbo Wang, Professor, Founder and Director, Research Centre for Quantum Information, Simulation and Algorithms, The University of Western Australia

Moderator:

Sopendu Mohanty, Group Chief Executive Officer, Global Finance & Technology Network (GFTN)

24 Mar
11:10am - 11:50am

Winthrop Hall

How to Build Better Money - Trust Stack for Money in Motion

Money is critical infrastructure & most people only notice it when it fails. This session explains how trust in digital payments & settlements can be strengthened as cyber threats rise, economies digitize, and quantum moves from theory to threat. You'll leave with practical trust upgrades that matter most for the decade ahead - access to resilient, secure money & payments in the age of disruption.

Speakers:

Kate Cooper, Chief Executive Officer, OKX

Dr. Mark Staples, Chief Technology Officer, Digital Finance CRC

Effie Dimitropoulos, Chief Executive Officer, AUDD Stablecoin

Alvinder Singh, Head, Innovation Acceleration Office, Monetary Authority of Singapore

Moderator:

Maha El Dimachki, Chief Executive Officer, GFTN Advisory, Global Finance & Technology Network (GFTN)

24 Mar
12:20pm - 1:00pm

Winthrop Hall

Why Are We Here? Beyond Machines & Money - Meaning, Consciousness & the Human Future

This session closes Day 1 by reframing the real challenge - not only what we can build, but what we should build, & what must remain deeply human. This fireside dialogue brings together perspectives across science, wisdom traditions & living knowledge to explore how we maintain humanity in the age of machines to grow beyond intelligence defined by language models - how we gain clarity, new perspectives & a stronger internal compass for navigating uncertainty.

Speakers:

Venerable Ajahn Brahm, Abbot, Bodhinyana Monastery

Prof. Bernard Carr, Emeritus Professor of Mathematics and Astronomy, Queen Mary University of London

Moderator:

Dr. Andrzej Gwizdalski, Co-founder & Chairman, Western Australia Web3 Association

Tuesday, 24 March 2026

Public-Private Roundtables

<p>24 Mar 1:30pm - 2:45pm</p> <p>UniClub - Roundtable Room 1</p>	<p>[Roundtable] Indo-Pacific Digital Money Infrastructures - Building the Next Wholesale Payment Rails</p> <p>Wholesale digital money is moving from experimentation to infrastructure. Across the Indo-Pacific & Europe, central banks, regulators & financial institutions are testing tokenised settlement models to improve cross-border payments, liquidity efficiency & risk management through initiatives such as Project Acacia (Australia), Project Guardian and BLOOM (Singapore).</p> <p>This closed-door session convenes senior leaders from policy, banking, market infrastructure, and technology providers to compare takeaways from leading pilots and align on what it will take to move from proofs-of-concept to interoperable, secure, scalable wholesale settlement rails across jurisdictions.</p> <p>The roundtable builds on GFTN's recently launched Digital Money principles, emphasising interoperability, sovereignty, resilience, trust, and inclusion. Participants will also consider enabling foundations underpinning trusted digital markets.</p> <p>Speakers: Alvinder Singh, Head, Innovation Acceleration Office, Monetary Authority of Singapore Kylie Stewart, Digital Currencies Senior Manager, Reserve Bank of Australia Dr. Mark Staples, Chief Technology Officer, Digital Finance CRC Doulos Lee, Manager, Bank Negara Malaysia Robert Porter, Head of Digital Asset Services (Business), Australia and New Zealand Banking Group (ANZ)</p> <p>Moderator: Maha El Dimachki, Chief Executive Officer, GFTN Advisory, Global Finance & Technology Network (GFTN)</p>
<p>24 Mar 1:30pm - 2:45pm</p> <p>UniClub - Roundtable Room 2</p>	<p>[Roundtable] Wiring the Indo-Pacific - Why WA is the Place for Green Compute Infrastructure at Scale</p> <p>Against a backdrop of rising geopolitical and geo-economic uncertainty, the Indo-Pacific's fast-growing digital economies are looking for infrastructure that can deliver both cost efficiency and ESG-aligned resilience. In this context, Western Australia is drawing increasing interest for the foundations that matter: clean and reliable energy, critical minerals for high-performance chips, global connectivity, secure and scalable compute, lower operating costs for business, and a stable, trusted operating environment.</p> <p>This session will explore how WA can convert these advantages into long-term strategic value for the state and international markets: offering internationally competitive services while supporting local industries and SMEs, creating future jobs, attracting investment, strengthening sustainable development, and positioning the state as a trusted hub in the region for next-generation digital infrastructure. It will also examine how public and private sectors and academia can work together to unlock this opportunity and ensure the benefits build a stronger regional economy.</p> <p>Speakers: Nils Hay, Chief Executive Officer, Mid West Development Commission Matthew Meszaros, Founder and Chief Executive Officer, Project Ohm Prof. Kate Brooks, Head, School of Electrical Engineering, Computing and Mathematical Sciences, Curtin University Margarita Kongawoin, Senior Vice President of Software & HPC, DUG Technology Brett Looney, Principal Solutions Architect, AWS Angela Trevithick, Executive Director, Manufacturing & Supply Chains Development, Department of Energy & Economic Diversification</p> <p>Moderator: Jason McFarlane, Director, Western Australian GreenTech Innovation Hub</p>

24 Mar
3:00pm - 4:15pm

UniClub - Roundtable
Room 1

[Roundtable] What Works in AI Delivery? Successes, Failures, & Solutions that Scale

AI is already improving productivity, safety and customer outcomes — but results vary widely. Some deployments deliver measurable gains; others stall because the basics aren't in place: weak data foundations, no clear owner, gaps in governance, security exposure, missing talent, hidden costs — and a failure to treat AI as operational infrastructure, not a plug-in tool.

This roundtable moves beyond “what is AI?” and focuses on what works—and what doesn't—when organisations deploy AI responsibly at scale. Leaders from banking, mining, healthcare, government and startups will share real examples: what they shipped, what got stuck, what made it succeed, and the lessons learned the hard way.

Speakers:

Shane Plant, Chief Commercial Officer, IMDEX

Iqbal Jumabhoy, Chief Executive Officer, Edge Capital Pte Ltd

Brad Hill, Co-GM, Pollinators

Jisoo Kim, Co-Founder and Director, ClearAI

Prof. Fiona Wood, Director of the Burns Service of WA, Fiona Wood Foundation

Dr. Brindha Jeyaraman, Founder and Chief Executive Officer, Aethryx

Prof. James Ong, Founder & Managing Director, Artificial Intelligence International Institute (AIII)

Schellie-Jayne (SJ) Price, Partner, Stirling & Rose

Prof. Daminda Alahakoon, Professor of Business Analytics and Artificial Intelligence, La Trobe University

Prof. Wei Liu, Associate Professor, University of Western Australia

Moderator:

Peter Deans, CEO and Co-Founder, Shelf Labs

24 Mar
3:00pm - 4:15pm

UniClub - Roundtable
Room 2

[Roundtable] Where's the Real Value? Investing Beyond Hype in the Next Economy (Quantum, AI, Tokenization, Green Infrastructure)

The “next economy” is already here (but not evenly distributed) with AI in everyday services, new digital markets through tokenisation, quantum-driven security upgrades, and green infrastructure powering modern compute. But not all growth stories are sustainable, and bubbles do happen (is AI due for a reset? Is Quantum finally ready?). That leaves a simple question for everyone—from mums and dads, VCs and family offices to Australia's super funds:

What does this mean for savings, wealth, retirement and the kind of economy we're building?

This roundtable brings together investors, technologists and researchers, regulators and practitioners to separate durable value from hype, and to define what high-return, responsible investing looks like under real uncertainty.

We also ask the hard questions: if some jobs disappear or shift, how do large funds still deliver for members and the broader economy—not just short-term winners?

Speakers:

Sebastien Picard, Founder & Chief Executive Officer, xcube.co

Lisa Schroeder, Associate Managing Director, QAI Ventures

Laksh Gangwani, Chief Growth Officer, ViewTrade

Josh Phillips, Chief Executive Officer and Co-founder, ClearAI

Deryck Graham, Founder & Chief Executive Officer, Portal Asset Management

Alvinder Singh, Head, Innovation Acceleration Office, Monetary Authority of Singapore

Drew Bradford, Chief Executive Officer, Macropod

Tetiana George, Co-Chair / CEO, Insurtech Australia / Curium

Moderator:

Tuesday, 24 March 2026

Workshop

Wednesday, 25 March 2026

Summit Stage

<p>25 Mar 9:00am - 9:05am</p> <p>Winthrop Hall</p>	<p>Welcome Back to the Black Swan Summit - From “Why” to “How”</p> <p>This session provides a fast reset that connects Day 1’s big-picture story on resilience, trust, sovereignty & human purpose to Day 2’s focus on delivery, scaling & real-world implementation. This is the pivot from insight to execution - what gets built, how, who owns it, & how we move from talk to outcomes.</p> <p>Moderator: Dr. Andrzej Gwizdalski, Co-founder & Chairman, Western Australia Web3 Association</p>
<p>25 Mar 9:15am - 9:45am</p> <p>Winthrop Hall</p>	<p>Agentic AI Is Here: How to Deploy Autonomous Agents Without Losing Control</p> <p>Speakers: Natasha Blycha, Chief Executive Officer, Stirling and Rose Charles Street, Executive Manager: Everyday Digital Experiences, Bankwest</p> <p>Moderator: Prof. James Ong, Founder & Managing Director, Artificial Intelligence International Institute (AIII)</p>
<p>25 Mar 9:55am - 10:35am</p> <p>Winthrop Hall</p>	<p>Trust Under Attack - The Identity Layer We Need for Real Time Money, Tokenization & AI</p> <p>Speed & convenience mean nothing if systems are fragile, surveillant or easy to break. Discussants will explore how to design digital infrastructures that remain secure, resilient & privacy-safe even under pressure, the safeguards that must be built in from Day One & approaches that are mature enough to deploy now.</p> <p>Speakers: Victoria Richardson, Partner, ID Partners Prof. Michael Small, CSIRO-UWA Chair of Complex Systems, Professor & Director, UWA Data Institute Prof. Bill Roscoe, Director, University College Oxford Blockchain Research Centre Dr. W. Scott Stornetta, Chief Executive Officer, SureMark Digital Identity Services</p> <p>Moderators: Paula Rogers, Principal Program Adviser, International Partnerships and Engagement, Perth USAsia Centre Dr. Andrzej Gwizdalski, Co-founder & Chairman, Western Australia Web3 Association</p>

<p>25 Mar 10:35am - 11:15am</p> <p>Winthrop Hall</p>	<h2>Tokenizing Real-World Assets: Can Pilots Mature into Real Markets?</h2> <p>Tokenization is moving beyond experiments into economic infrastructure across trade, commodities, energy, carbon & finance - but only when it becomes institutional-grade in terms of custody, legal clarity, interoperability & governance. This session focuses on the leap from “interesting demo” to scalable market workflows that banks, industry & regulators can trust. Participants gain practical insight into how tokenized corridors can reduce friction, improve provenance, accelerate settlement & unlock new financing pathways.</p> <p>Speakers: Rob Allen, Head of Hedera Enterprise Adoption Team , Hashgraph Kassia Kazmer, Chief Executive Officer and Co-founder, ProspEx Group Dr. Mark Staples, Chief Technology Officer, Digital Finance CRC Robert Porter, Head of Digital Asset Services (Business), Australia and New Zealand Banking Group (ANZ)</p> <p>Moderator: Amy-Rose Goodey, Chief Executive Officer, Digital Economy Council of Australia (DECA)</p>
<p>25 Mar 11:15am - 11:55am</p> <p>Winthrop Hall</p>	<h2>Regulation as Enabling Infrastructure - Trust, Interoperability & Investment-Ready Markets</h2> <p>The next economy will be built on rules, standards, supervision & cross-border interoperability that make innovation safe to scale. This session reframes regulation as enabling infrastructure by reducing uncertainty, protecting consumers, preventing systemic failure & unlocking capital. Attendees leave with greater clarity on what “investment-ready” markets require in the next 12–24 months.</p> <p>Speakers: Jag Foo, Chief Security and Policy Officer, Safeheron Jannah Patchay, Executive in Residence & Board Member, Global Digital Finance Nina Skewes, Privacy Deputy Commissioner, Office of the Information Commissioner WA</p> <p>Moderator: Steve Vallas, Chief Executive Officer, Blockchain APAC</p>
<p>25 Mar 11:55am - 12:35pm</p> <p>Winthrop Hall</p>	<h2>Talent as Critical Infrastructure - Rebuilding Work, Skills & Opportunity in the Age of AI</h2> <p>Talent and research are crucial engines of digital economies. This session tackles the systemic challenge of tech-driven disruption, examining how to build robust talent pipelines and bridge the gap between lab and market. Experts will discuss how academic research translates into deployable innovations, how industry-university partnerships can be fostered to deliver real-world applications, and how reskilling can be scaled to meet market demand. Attendees will gain outcome-driven insights with illustrative examples from Western Australia’s experience as a live testbed for scalable models of collaboration.</p> <p>Speakers: Amy Stanley, Chief People Officer, HBF Health Limited Prof. David Lee Kuo Chuen, Chairman, Global Fintech Institute Dr. Diane Smith-Gander AO, Chancellor, University of Western Australia Prof. Lam Khin Yong, Vice President (Industry), Nanyang Technological University, Singapore</p> <p>Moderator: Paula Rogers, Principal Program Adviser, International Partnerships and Engagement, Perth USAsia Centre</p>

Public-Private Roundtables

25 Mar
1:30pm - 2:45pm

UniClub - Roundtable
Room 1

[Roundtable] How to Design Quantum-Safe Systems - A Post-Quantum Cryptography Migration Plan for Critical Infrastructure

Quantum computing is driving a security transition—not because the “quantum apocalypse is tomorrow,” but because long-lived data and systems in finance, government identity, healthcare, defence, energy networks and communications can be compromised today through “harvest now, decrypt later.” The systemic risk is straightforward: if we wait until the last minute, migration becomes chaotic, expensive, and operationally disruptive while compromising critical systems.

This is a how-to roundtable for moving from PQC awareness to execution. Banks, big tech, government, security agencies and critical infrastructure operators will align on practical steps: cryptographic inventory, crypto-agility, standards alignment, vendor and supply-chain readiness, procurement language, testing, and staged migration—so organisations can upgrade without breaking interoperability or service continuity.

Outcomes: Insights from discussions will contribute towards GFTN’s work on a practical Quantum-Safe Migration Starter Pack with priority systems list, decision points, recommended timelines and a minimum target state for crypto-agility plus a shortlist of “next-wave” opportunities worth piloting.

Speakers:

- Dr. Rajiv Shah**, Director, Australian Information Security Association
- Tan Bin Ru**, President, Enterprise Digital, ST Engineering
- Prof. Michael Small**, CSIRO-UWA Chair of Complex Systems, Professor & Director, UWA Data Institute
- Eamonn Darcy**, Chief Technology Officer, AQ Intelligence
- Tara Lie**, Cyber Security GRC Manager / PhD Candidate, Department of Water & Environmental Regulation / Edith Cowan University

25 Mar
3:00pm - 4:15pm

UniClub - Roundtable
Room 2

[Roundtable] Tokenized Trade & Investment Advantage: Making Real-World Assets Liquid and Trusted Across Borders

Tokenisation is moving from experimentation to industrial advantage - but only for organisations that can translate pilots into real workflows and profitable business models, compliant structures & interoperable cross-border trade corridors. From critical minerals & energy to carbon credits, inventory, invoices & high-value goods like art, tokenized assets can reduce friction, accelerate settlement, improve provenance & unlock new financing models.

This roundtable focuses on execution: where tokenization truly beats current systems, how to start with the right use cases, how to design compliant structures & how to build pilots that scale across borders. Western Australia’s position in critical minerals, resources, agriculture, First Nations art & energy makes it a natural launchpad for Indo-Pacific tokenized trade corridors.

Speakers:

- Liam Hennessy**, Partner, Thomson Geer
- Steve Vallas**, Chief Executive Officer, Blockchain APAC
- Prof. Bill Roscoe**, Director, University College Oxford Blockchain Research Centre
- Prof. Kadambot Siddique**, Hackett Professor of Agriculture Chair and Director, The UWA Institute of Agriculture, The University of Western Australia
- Josh Hunt**, Director and General Counsel, ProspEx Group
- Scott Waller**, Asia Pacific Assurance Blockchain Leader, EY
- IGP Rahman Desyanta**, Chief Executive Officer, Baliola

[Side Event by CyberWest Hub] Building Cyber Resilience: Moving People from Awareness to Action

CyberWest Hub is proud to collaborate with Black Swan Summit to bring a powerful, people-centred cyber session to Perth this March — led by Caitriona Forde, award-winning cyber safety expert and founder of caIT Cyber Safe.

Cyber awareness programs can make people both more cautious and more vulnerable. Culture matters more than compliance — and the reasons your initiatives aren't sticking have nothing to do with your people.

In this interactive Cyber Connect workshop, we'll explore what truly moves individuals from understanding to action, particularly as threats become more sophisticated and increasingly human-driven. The session will unpack what truly drives people to move from understanding to action as threats become more sophisticated and increasingly human-driven. Instead of focusing on technology, we centre the human factors that determine whether security messages translate into consistent, confident behaviour.

What participants will take away:

- A grounded understanding of the emerging cyber risks and opportunities affecting organisations in WA
- Practical insights on building resilience and embedding cyber awareness across teams and operations
- Real-world examples of capability gaps—and opportunities—to strengthen regional and sector-wide preparedness
- A clearer view of how cyber security underpins trust, innovation, and long-term strategic growth
- New relationships and cross-sector connections that support collaboration beyond the event

This is not a technical deep dive. It's a practical conversation for leaders who recognise that cyber resilience starts with people.

Attending Organisations

Central Bank or Regulator

- Australian Health Practitioner Regulation Agency
- Australian Securities & Investments Commission (ASIC)
- Bangladesh Bank
- Bank Negara Malaysia
- Central Bank of Nigeria
- Monetary Authority of Singapore
